

The website is <https://coralcap.co/>

The website is in word-press and build using visual composer, however we are looking to build this website in Divi. We need same look and feel and the links should retain as it is, We do not want the SEO to be affected.

We can provide you the copy of the existing website (on staging server) and you need to convert it in to Divi Theme. Please note that the website is multilingual (Japanese and English).

Please provide a detailed time and cost estimation with hours breakdown.
